

SKILLSETS

- I am a highly self-motivated designer always looking for ways to broaden my skillset and become a better artist.
- 3D and 2D Graphic Design work, Mesh sculpting, PBR Texture creation.
- Light Programming and Web Design experience using a multitude of languages, responsive webpage and user interface design.
- 20+ years experience troubleshooting, fixing, repairing, and doing tons of things both technical and creative with computer hardware and software.
- Adept multitasker, accustomed to deadlines and fast-paced environments.
- Experience caring for both personal customers while running my own business, and corporate customers as a part of a team. Always receptive to constructive criticism or feedback that pushes the project to the next level.
- I often work best in roles that leverage my multidisciplinary nature and bridge the gap between the technical programming side and the realm of artistic design.

SOFTWARE
